Kitchen Concept

Stylish, Elegant & Durable

Gleaming glass panel doors on kitchen cabinets, a trend in the 1990s have made a remarkable comeback. Homeowners realize glass panels do not have to be your grandmother's kitchen cabinets since they can now incorporate more style variations into glass front cabinets. They can easily install new pre-assembled glass panels or opt for a do it yourself project. Most people opt for ready to go glass panels for their kitchen cabinets.

Clear glass panels add visual space to a small galley type kitchens since they bounce light all around the room.

EMERALD *series*

Doors may have glass windows constructed of muntins and mullions holding glass panels. Other designs either mimic the divided-light look of muntins and mullions with overlays, or may dispense with them altogether. Cabinets using glass doors sometimes use glass shelves and interior lighting from the top of a cabinet. A glass shelf allows light to reach throughout a cabinet. For a special display effect, the interior rear of a cabinet may be covered with a mirror to further distribute light.

Black kitchen cabinets have been trendy for awhile now and you don't have to be scared of them. It's still a neutral color but it's also a lot different from the basic white cabinetry. Black cabinets really work well in modern and contemporary design. You'll really want to keep things simple so that you drive home this design style.

Glass can make an impact in a row of kitchen cabinets. They commonly placed near the ceiling or in a few choice cabinets, such as those on each end of a countertop. They also work well on an island where the cabinets are storing decorative statements.

Glass Panel

Incorporating glass into your kitchen cabinetry brings extra light and an air of added space to your kitchen. You can mix glass with aluminium for a sleek, contemporary design or combine it with solid oak frames for more of a country look. Glass offers great versatility, offering clear, textured and solid glass for your cabinet door design.
